***NxTech and Boston Software Deliver First WinRater/SinglePoint Homeowners
New Business Quote and Submit Interface for NLC Insurance Companies***

Milford, Ohio (January 25, 2010) – NxTech, Incorporated, a leading provider of Real Time and Download interfaces, system integration, and data management and Boston Software, a leading provider of comparative rating software to independent insurance agents and carriers have implemented Real Time submission of new business Homeowners quotes through WinRater/SinglePoint for New London County Mutual Insurance Companies.

NxTech ConneXt software receives the ACORD XML data from WinRater/SinglePoint and instantly translates and loads the data into NLC's LegaSuite system. LegaSuite returns a Quote Sheet for agent review, saving valuable time and eliminating double entry of data!

New London County Mutual (NLC) is the first carrier to provide Massachusetts agents with Boston Software's SUBMIT NOW capability for homeowners business. This time-saving feature enables agents to capture virtually 100% of the required data for new business submissions within WinRater/Singlepoint before it is uploaded to NLC's LegaSuite system with the click of a few buttons. NxTech receives the incoming ACORD XML data and translates it so information can be processed within the NLC system appropriately.

Carol Carlson, Insurance Software Manager at NLC Insurance said, "We have worked with NxTech for years as our partner to make Ease of Doing Business a reality for our agents. NxTech does a tremendous job integrating incoming data into our rating and processing systems. Real time that starts in WinRater/SinglePoint and ends in our system using single entry is very exciting for our agents and our company."

Charlie Walsh, Director of Marketing at Boston Software added, "Making the quote-to-issue process as quick and easy as possible is the name of the game. Plugging NLC into our SinglePoint system and Submit Now feature is a huge step in the right direction."

Thad Bauer, President of NxTech said, "New London continues to seek efficient and easy to use workflow processes to provide to their agents. They fully understand the value added to improved workflow processes by using electronic interfaces and promoting the ACORD standards. Being part of the implementation with Boston Software's new SUBMIT NOW for Homeowners, and working once again with NLC, NxTech is proud to continue delivering robust interface solutions to the insurance industry."
